REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

regarding claim 23, the prior art of record does not disclose or suggest a connecting member further comprising a second locking member having a second button and a second tab normally biased through a third opening in a housing, and being in the housing. The closest prior art, Moretti et al., USP 5,374,088, and Taylor, USP 6,461,074, only discloses one locking member, as claimed and there is no motivation, absent applicant's own disclosure, to modify Moretti et al. or Taylor because a second locking member with the configuration as claimed is not disclosed as present. Moreover, one skilled in the art would be motivated to use the same identical first locking member as the second locking member at the other end of the housing, i.e., duplication of parts, if one were looking to provide another connection. Further, Moretti et al. '088 cannot be modified in the manner required by the claim since placing a second opening and a third opening in the housing at an end of the housing will make the housing leak at the end which would be contrary to the goal of Moretti et al. of a sealed connection (note that the hollow interior is for the passage of fluid).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
